

OPERATIONS & TECHNICAL VACANCIES

Micross Components is a global provider of specialist products & services and distributed components such as bare die, wafers, chip capacitors / resistors and many more for the electronics community. We are a supplier and manufacturer of solutions for hi-reliability and state-of-the-art electronic applications which span across space, military, commercial, industrial and hi-rel markets. Due to internal changes and to support our continued growth we currently have the following vacancies:

Operations Manager

This role is essential to the success of our organisation as the successful candidate will be responsible for managing our Die, Assembly and Test facilities based here in Norwich. Duties include directing the manufacturing, maintenance, quality and logistic functions. Managing a multi-disciplinary team whilst continuously upgrading service quality is part of your overall supervision of the supply chain. The successful candidate will have a proven record of operational delivery within the semiconductor manufacturing sector and will make a significant contribution, delivering group business objectives, achieving profitable business growth whilst maintaining operational excellence.

Technical Process Engineer

This person is required to provide the technical link between our customers and our operations. Specific tasks will include process support for die removal; wafer sawing, identifying correct materials for die attach and wire bonding activities. Technical costing input will also be required to assist Sales in the preparation of quotations. The ideal candidate will have an electronics degree and come from a strong semiconductor background.

Technician

This position is based in our Test Department and duties will include creating Test Programs to customer and manufacturer specifications, fault finding of test equipment and test circuitry. Assisting with the probing of electronic wafers and developing process requirements for new product. If you have an electronics diploma and wish to pursue a career in the electronics industry we would like to hear from you.

These are excellent opportunities and if you would like to join a successful and growing organisation please send your CV to ben.white@micross.com stating which position you wish to apply for.
