

HYBRID-HIGH RELIABILITY RADIATION HARDENED DC-DC CONVERTER

Description

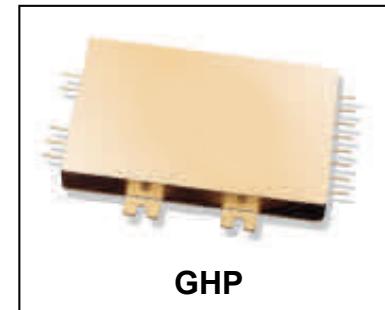

The GHP2815S is a low voltage 15V/8A single output DC-DC converter. It is specifically designed in response to the need for moderate power, high efficiency and tight regulation required by modern day space design applications. This radiation hardened, high reliability converter is designed for extended operation in hostile environments. Its small size and low weight makes the GHP2815S ideal for applications such as geostationary earth orbit satellites and deep space probes. It exhibits a high tolerance to total ionizing dose, single event effects and environmental stresses such as temperature extremes, mechanical shock, and vibration. All components are fully de-rated to meet the requirements of MIL-STD-975, MIL-STD-1547 and GSFC PPL-21 Appendix B.

The design incorporates a fixed frequency topology with magnetic feedback. Incorporation of many functional features including external inhibit, output remote sensing, under-voltage lockout and synchronization makes this device suitable for today's space design applications.

The converter is enclosed in a hermetically sealed package with the overall dimensions of 3.50" L x 2.50" W x 0.475" H including the I/O pins and mounting tabs. The base material is aluminum-silicon-carbide. The lid material is Kovar. The I/O pins are rugged ceramic feed-through copper core Alloy 52. The lid is seam sealed using parallel seam welding. A complete GHP2815S converter weighs 110 grams maximum.

Manufactured in a facility fully qualified to MIL-PRF-38534, these converters are fabricated utilizing DLA qualified processes. For available screening options, refer to device screening table in the data sheet.

120W, Single Output

Features

- Total Ionizing Dose > 100 kRads(Si)
- SEE Hardened to LET up to 82 MeV.cm²/mg
- Low Weight < 110 grams
- Magnetically Coupled Feedback
- 18V to 40V DC Input Range
- Up to 120W Output Power
- High Efficiency - to 87%
- -55°C to +85°C Operating Temperature Range
- 100MΩ @ 500VDC Isolation
- Under-Voltage Lockout
- Short Circuit and Overload Protection
- Output Voltage Adjust
- Synchronization Input and Output
- Remote Sense
- External Inhibit

Applications

- Deep Space Satellites / Probes
- Strategic Weapons and Communication System
- Geostationary Earth Orbit Satellites (GEO)

Notes:

1. Parameter is tested as part of design characterization or after design changes. Thereafter, parameter shall be guaranteed to the limits specified.
2. Parameter verified during line and load regulation tests.
3. Guaranteed for a DC to 20MHz bandwidth. Tested using a 20kHz to 10MHz bandwidth.
4. Capacitive load may be any value from 0 to the maximum limit without compromising DC performance.
5. Load step transition time $\geq 10\mu\text{s}$
6. Recovery time is measured from the initiation of the transient to where V_{OUT} has returned to within $\pm 1\%$ of its steady state value.
7. Line step transition time $\geq 100\mu\text{s}$.
8. Turn-on delay time from either a step application of input power or a logical low to high transition on the inhibit pin (pin 3) while power is applied to the input to the point where $V_{\text{OUT}} = 90\%$ of nominal.
9. Overload Power Dissipation is defined as the device power dissipation with the load set such that $V_{\text{OUT}} = 90\%$ of nominal.

Notes:

- ① Best commercial practice.
- ② CK is a DLA Land and Maritime (formerly DSCC) part marking used to designate a Class K compliant hybrid. The CK marking does not indicate the hybrid is radiation certified.
- No Suffix is a radiation rated device but not available as a DLA Land and Maritime qualified SMD per MIL-PRF-38534.
- ③ Any Engineering Model (EM) build with the "EM" Suffix shall only be form, fit and functional equivalent to its Flight Model (FM) counterpart, and it may not meet the radiation performance. The EM Model shall not be expected comply with MIL-PRF-38534 flight quality/workmanship standards, and configuration control. An EM build may use electrical equivalent commercial grade components. IR HiRel will provide a list of non-compliance items upon request.
