November 7, 2023

Mr. Steven White
Quality Manager
Micross Die & Hi-Rel Components
1810 S. Orange Blossom Trail
Apopka, FL 32703

Dear Mr. White:

Re: Certification, Hybrid Microcircuits MIL-PRF-38534, FSC 5962, VQH-24-038230,
CN 085856.

Your hybrid facility at the above address was sample audited the week of September 18-22, 2023, for compliance with MIL-PRF-38534 Class H, Technology Review Board (TRB) Option, and your Quality Management Systems, Manual, MCO-Q-102 revision 10. Based on our sample, an acceptable level of confidence has been established that compliance with these requirements exists. Therefore, Micross Component's Class H certification is continued effective November 7, 2023.

This certification is valid until terminated by written notification from the qualifying activity. The normal period of certification is two years from the date of the audit and, if warranted, may be withdrawn by DLA Land and Maritime-VQH at any time. Your facility may be re-audited on a drop-in basis at any time.

All screening, qualification, conformance, and periodic inspection must be performed at a facility which has a DLA Land and Maritime-VQ letter of Laboratory Suitability for the applicable test method and condition.

QML manufacturers shall notify the qualifying activity immediately after learning of a potential issuance of a GIDEP alert, problem advisory or major quality/reliability problem affecting QML products. This includes failure to perform screening or sample testing (including inspection) in accordance with MIL-PRF-38534. Failure to provide notification may be grounds for removal from QML-38534.

If you have any questions, please contact Mrs. Cassandra Chalkias at (614) 692-2345

Sincerely,

for BRADLEY P. DESLICH
Chief
Hybrid Devices Branch
