

Environmental (Reliability) Test Services

One Source for Full Turnkey Advanced Test Solutions

Micross Silicon Turnkey Solutions (STS) advanced testing facility provides more than 40 years of component and product testing expertise to meet critical program and application needs.

Our core engineering and manufacturing strengths provide advanced solutions in areas such as environmental testing, electrical test and specialty packaging, as well as component, board and reliability qualification testing services.

One Source. One Solution.™

Environmental Test Capabilities

one source. one solution."

Providing Extensive Environmental Test Services across a Vast Array of Applications:

- Autoclave
- Ball Shear
- Constant Acceleration
- Die Shear
- EFR Analysis
- ESD (HBM, MM, CDM)
- Fine & Gross Leak
- High and Low Temperature Operating Limits (HTOL/LTOL)
- Highly Accelerated Stress Test (HAST)
- High Temperature Storage Life (HTSL)
- Latch-up
- Mechanical Shock
- Preconditioning & Moisture Resistance Test
- Salt Atmosphere
- Seal Testing
- Temperature/Humidity Bias (THB)
- Temperature & Power Cycling
- Thermal Shock
- Vibration
- Wire Pull

Next-Gen Reliability

- Advanced Chamberless Burn-in
- Liquid Burn-in
- Thermal-Electric Cooling

Typical Applications

- Hybrids
- Monolithics
- Discrete Semiconductors
- PEMs
- SiPs

Quality Certifications

- DMEA Trusted Source
- DLA Certified
- ITAR-Registered
- AS9100:2016/ISO 9001:2015
- MIL-STD-202
- MIL-STD-750
- MIL-STD-883
- MIL-PRF-38535 QML Level Q Assembly & Test

As the One Source Solution, Micross also provides:

- Test Program Development
- Electrical Testing
- Mechanical Testing
- Package Testing
- Advanced Packaging & Assembly Services
- Plastic Encapsulated Microcircuit (PEM) Qualification
- Tester Rental
