

Leading Global Source for Bare Die, Wafer & Value-Added Services

Micross is the global one-source provider of Bare Die & Wafers, Advanced Interconnect Technology, Custom Packaging & Assembly, Component Modification Services, Electrical & Environmental Testing and Hi-Rel Products to manufacturers and users of semiconductor devices. In business for more than 40 years, our extensive hi-reliability capabilities serve the Aerospace & Defense, Space, Medical and Industrial markets. Micross possesses the sourcing, packaging, assembly, engineering, test and logistics expertise needed to support an application throughout its entire program cycle.

Authorized by over 25 major semiconductor manufacturers with access to thousands of different part types, Micross offers unparalleled in-house knowledge coupled with the flexibility to adapt our suppliers' standard products to a customer's specific device or system requirement, even the most challenging.

Leveraging our
BARE DIE
LINE CARD
 for **YOU**

Benefits

- 40+ Years' in Worldwide Bare Die & Wafer Distribution
- Largest authorized line card for bare die & wafers
- Global One-source solution offering the broadest range of capabilities to meet customer demands
- Most experienced in-house engineering support team - design application and engineering solutions

Micross' key partnerships with over thirty of the world's leading semiconductor manufacturers give our customers direct and authorized access to a variety of proprietary and high performance products. Our customers benefit from a complete array of post-wafer fab processing capabilities and services that are unmatched in the industry and have been qualified to meet the demanding requirements of aerospace & defense, space, medical and industrial harsh environment applications.

ON Semiconductor

Micross is not limited to the manufacturers above. Contact your sales representative for all your die and wafer needs.
